EXPLANATORY NOTES

1. **Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.

2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at DBS during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Electricity reports can usually be included in statistics for the month in which the exports actually occurred. Reports of pipeline exports of crude petroleum only arrive in time for inclusion in statistics for the month following the month of actual export.

3. Coverage:

a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

c. **Exclusions:** The following commodity movements are excluded from export statistics (some are recorded separately as Special

NOTES EXPLICATIVES

1. **Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

2. **Périodes de temps:** La statistique des exportations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'exportation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité et le pétrole exporté par oléoduc reçus dans les douze jours ouvrables qui suivent le mois civil. Il se produit souvent des délais dans la perception ou l'expédition des documents douaniers d'exportation, notamment pour ce qui est de ceux qui ont trait aux marchandises expédiées par bateau. Les rapports sur l'électricité peuvent être habituellement inclus dans la statistique du mois durant lequel les exportations d'électricité ont effectivement eu lieu. Les rapports sur l'exportation de pétrole brut par oléoduc arrivent à temps seulement pour figurer dans la statistique du mois suivant celui où l'exportation a vraiment eu lieu.

3. Couverture:

a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou le réemballage ne modifient pas l'état des marchandises importées.

c. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (quelques-uns sont classés séparé-

Transactions—Non-trade in Table 6): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

ment comme transactions spéciales—hors commerce dans le tableau 6): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire (classe 880-29) et une petite quantité de déchets d'or sous la forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

4. Countries Credited: Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

4. Pays de destination: Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

5. Quantities: Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use the same measure of quantity.

5. Quantités: Les tableaux 4 et 6 donnent les quantités selon le système d'unités indiquées pour chaque catégorie dans la Classification des marchandises d'exportation, Vol. I (B.F.S. numéro de Catalogue 12-521). Quand aucune unité de quantité n'est mentionnée, les colonnes réservées aux quantités sont laissées en blanc. Le tableau 5 indique les quantités seulement là où toutes les catégories dans un groupe ou la majeure partie des catégories utilisent la même mesure de quantité.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

Les unités de poids ou de volumes visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces (dans n'importe quelle catégorie de marchandises où la valeur enregistrée comprend les articles complets de même que les pièces de ces articles, il est impossible d'établir la valeur moyenne par unité complète). Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 7.

6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of exports in any commodity class (or group) to a particular country is less than \$500, no line for that country is printed in the report. Where the cumulative value is more than \$500 but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in the report.

7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

6. **Valeurs:** Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou à recevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.) Cette définition établirait donc la valeur des exportations f. à b. point de destination, mais on réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des exportations dans une catégorie (ou groupe) quelconque vers un pays en particulier n'atteint pas \$500, alors ce pays ne paraît pas dans le rapport. Lorsque la valeur cumulative est supérieure à \$500, et la valeur touchant le mois en cours est inférieure à \$500, le rapport n'indique aucune valeur dans la colonne du mois en cours; une valeur est indiquée, cependant, dans la colonne de la valeur cumulative. Dans ces cas-là, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas. Tous les totaux et les valeurs cumulatives sont calculés à partir de chiffres non arrondis qui sont ensuite arrondis indépendamment en milliers de dollars; ces valeurs ainsi obtenues peuvent souvent différer de la somme des valeurs arrondies figurant dans chaque rapport mensuel.

7. **Abréviations:** Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans la "Classification des marchandises d'exportation, Vol. I". Les lettres "n.d.a." signifient "non dénommé ailleurs".

8. **Rectifications:** Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de chaque rapport mensuel.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

Indices de la valeur, des prix et du volume des exportations nationales

Ce rapport fait suite à la publication, commencée en janvier 1961, des indices de la valeur, des prix et du volume des exportations nationales, disposés d'après les sections de la Classification des marchandises d'exportation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'exportation, est complètement exclue des indices.

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification. L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.

EXPLANATORY NOTES

NOTES EXPLICATIVES

1. **Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.

2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at DBS during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Electricity reports can usually be included in statistics for the month in which the exports actually occurred. Reports of pipeline exports of crude petroleum only arrive in time for inclusion in statistics for the month following the month of actual export.

3. Coverage:

a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

c. **Exclusions:** The following commodity movements are excluded from export statistics (some are recorded separately as Special

1. **Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

2. **Périodes de temps:** La statistique des exportations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'exportation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité et le pétrole exporté par oléoduc reçus dans les douze jours ouvrables qui suivent le mois civil. Il se produit souvent des délais dans la perception ou l'expédition des documents douaniers d'exportation, notamment pour ce qui est de ceux qui ont trait aux marchandises expédiées par bateau. Les rapports sur l'électricité peuvent être habituellement inclus dans la statistique du mois durant lequel les exportations d'électricité ont effectivement eu lieu. Les rapports sur l'exportation de pétrole brut par oléoduc arrivent à temps seulement pour figurer dans la statistique du mois suivant celui où l'exportation a vraiment eu lieu.

3. Couverture:

a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou le réemballage ne modifient pas l'état des marchandises importées.

c. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (quelques-uns sont classés séparé-

Transactions—Non-trade in Table 6): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

ment comme transactions spéciales—hors commerce dans le tableau 6): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire (classe 880-29) et une petite quantité de déchets d'or sous la forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

4. Countries Credited: Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

4. Pays de destination: Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

5. Quantities: Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use the same measure of quantity.

5. Quantités: Les tableaux 4 et 6 donnent les quantités selon le système d'unités indiquées pour chaque catégorie dans la Classification des marchandises d'exportation, Vol. I (B.F.S. numéro de Catalogue 12-521). Quand aucune unité de quantité n'est mentionnée, les colonnes réservées aux quantités sont laissées en blanc. Le tableau 5 indique les quantités seulement là où toutes les catégories dans un groupe ou la majeure partie des catégories utilisent la même mesure de quantité.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

Les unités de poids ou de volumes visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces (dans n'importe quelle catégorie de marchandises où la valeur enregistrée comprend les articles complets de même que les pièces de ces articles, il est impossible d'établir la valeur moyenne par unité complète). Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 7.

6. Values: Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all 'charges' (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of exports in any commodity class (or group) to a particular country is less than \$500, no line for that country is printed in the report. Where the cumulative value is more than \$500 but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in the report.

7. Abbreviations: Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

8. Revisions: All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

6. Valeurs: Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou à recevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.) Cette définition établirait donc la valeur des exportations f. à b. point de destination, mais on réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des exportations dans une catégorie (ou groupe) quelconque vers un pays en particulier n'atteint pas \$500, alors ce pays ne paraît pas dans le rapport. Lorsque la valeur cumulative est supérieure à \$500, et la valeur touchant le mois en cours est inférieure à \$500, le rapport n'indique aucune valeur dans la colonne du mois en cours; une valeur est indiquée, cependant, dans la colonne de la valeur cumulative. Dans ces cas-là, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas. Tous les totaux et les valeurs cumulatives sont calculés à partir de chiffres non arrondis qui sont ensuite arrondis indépendamment en milliers de dollars; ces valeurs ainsi obtenues peuvent souvent différer de la somme des valeurs arrondies figurant dans chaque rapport mensuel.

7. Abréviations: Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans la "Classification des marchandises d'exportation, Vol. I". Les lettres "n.d.a." signifient "non dénommé ailleurs".

8. Rectifications: Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de chaque rapport mensuel.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

Indices de la valeur, des prix et du volume des exportations nationales

Ce rapport fait suite à la publication, commencée en janvier 1961, des indices de la valeur, des prix et du volume des exportations nationales, disposés d'après les sections de la Classification des marchandises d'exportation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'exportation, est complètement exclue des indices.

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification. L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.

EXPLANATORY NOTES

1. **Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.

2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at DBS during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Electricity reports can usually be included in statistics for the month in which the exports actually occurred. Reports of pipeline exports of crude petroleum only arrive in time for inclusion in statistics for the month following the month of actual export.

3. Coverage:

a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

c. **Exclusions:** The following commodity movements are excluded from export statistics (some are recorded separately as Special

NOTES EXPLICATIVES

1. **Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

2. **Périodes de temps:** La statistique des exportations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'exportation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité et le pétrole exporté par oléoduc reçus dans les douze jours ouvrables qui suivent le mois civil. Il se produit souvent des délais dans la perception ou l'expédition des documents douaniers d'exportation, notamment pour ce qui est de ceux qui ont trait aux marchandises expédiées par bateau. Les rapports sur l'électricité peuvent être habituellement inclus dans la statistique du mois durant lequel les exportations d'électricité ont effectivement eu lieu. Les rapports sur l'exportation de pétrole brut par oléoduc arrivent à temps seulement pour figurer dans la statistique du mois suivant celui où l'exportation a vraiment eu lieu.

3. Couverture:

a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou le réemballage ne modifient pas l'état des marchandises importées.

c. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (quelques-uns sont classés séparément

Transactions—Non-trade in Table 6): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

ment comme transactions spéciales—hors commerce dans le tableau 6): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire (classe 880-29) et une petite quantité de déchets d'or sous la forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

4. **Pays de destination:** Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

5. **Quantities:** Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use the same measure of quantity.

5. **Quantités:** Les tableaux 4 et 6 donnent les quantités selon le système d'unités indiquées pour chaque catégorie dans la Classification des marchandises d'exportation, Vol. I (B.F.S. numéro de Catalogue 12-521). Quand aucune unité de quantité n'est mentionnée, les colonnes réservées aux quantités sont laissées en blanc. Le tableau 5 indique les quantités seulement là où toutes les catégories dans un groupe ou la majeure partie des catégories utilisent la même mesure de quantité.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

Les unités de poids ou de volumes visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces (dans n'importe quelle catégorie de marchandises où la valeur enregistrée comprend les articles complets de même que les pièces de ces articles, il est impossible d'établir la valeur moyenne par unité complète). Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 7.

6. Values: Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of exports in any commodity class (or group) to a particular country is less than \$500, no line for that country is printed in the report. Where the cumulative value is more than \$500 but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in the report.

7. Abbreviations: Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

8. Revisions: All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

6. Valeurs: Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou à recevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.) Cette définition établirait donc la valeur des exportations f. à b. point de destination, mais en réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des exportations dans une catégorie (ou groupe) quelconque vers un pays en particulier n'atteint pas \$500, alors ce pays ne paraît pas dans le rapport. Lorsque la valeur cumulative est supérieure à \$500, et la valeur touchant le mois en cours est inférieure à \$500, le rapport n'indique aucune valeur dans la colonne du mois en cours; une valeur est indiquée, cependant, dans la colonne de la valeur cumulative. Dans ces cas-là, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas. Tous les totaux et les valeurs cumulatives sont calculés à partir de chiffres non arrondis qui sont ensuite arrondis indépendamment en milliers de dollars; ces valeurs ainsi obtenues peuvent souvent différer de la somme des valeurs arrondies figurant dans chaque rapport mensuel.

7. Abréviations: Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans la "Classification des marchandises d'exportation, Vol. I". Les lettres "n.d.a." signifient "non dénommé ailleurs".

8. Rectifications: Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de chaque rapport mensuel.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

Indices de la valeur, des prix et du volume des exportations nationales

Ce rapport fait suite à la publication, commencée en janvier 1961, des indices de la valeur, des prix et du volume des exportations nationales, disposés d'après les sections de la Classification des marchandises d'exportation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'exportation, est complètement exclue des indices.

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification. L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.

EXPLANATORY NOTES

1. Source of Data: Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.

2. Time Periods: Export statistics for any month include all goods declared on export entries received at DBS during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Electricity reports can usually be included in statistics for the month in which the exports actually occurred. Reports of pipeline exports of crude petroleum only arrive in time for inclusion in statistics for the month following the month of actual export.

3. Coverage:

a. Domestic Exports: Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.

b. Re-Exports: Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

c. Exclusions: The following commodity movements are excluded from export statistics (some are recorded separately as Special

NOTES EXPLICATIVES

1. Source des données: La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes, sauf dans le cas des données sur l'électricité et le pétrole brut exporté par oléoduc. Les rapports sur l'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national de l'énergie, tandis que les compagnies exportatrices de pétrole par oléoduc fournissent directement leurs rapports au Bureau fédéral de la statistique.

2. Périodes de temps: La statistique des exportations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'exportation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité et le pétrole exporté par oléoduc reçus dans les douze jours ouvrables qui suivent le mois civil. Il se produit souvent des délais dans la perception ou l'expédition des documents douaniers d'exportation, notamment pour ce qui est de ceux qui ont trait aux marchandises expédiées par bateau. Les rapports sur l'électricité peuvent être habituellement inclus dans la statistique du mois durant lequel les exportations d'électricité ont effectivement eu lieu. Les rapports sur l'exportation de pétrole brut par oléoduc arrivent à temps seulement pour figurer dans la statistique du mois suivant celui où l'exportation a vraiment eu lieu.

3. Couverture:

a. Exportations nationales: La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau au Canada et ensuite exportées.

b. Réexportations: La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou le réemballage ne modifient pas l'état des marchandises importées.

c. Exclusions: Les mouvements de marchandises suivants sont exclus de la statistique des exportations (quelques-uns sont classés séparé-

Transactions—Non-trade in Table 6): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.

4. Countries Credited: Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.

5. Quantities: Tables 4 and 6 show quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty. Table 5 shows quantities only where all (or substantially all) of the classes in a group use the same measure of quantity.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

ment comme transactions spéciales—hors commerce dans le tableau 6): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la valeur totale, sauf les alliages d'or dentaire (classe 880-29) et une petite quantité de déchets d'or sous la forme de balayures de bijoutiers (classe 256-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes; les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger ou réexportées à l'extérieur du Canada par les forces armées des alliés du Canada de l'OTAN ou par les diplomates étrangers; les exportations provisoires pour les expositions ou les concours (et les films exportés en vue de leur projection ou de leur développement ou les films retournés après projection ou développement au Canada); les exportations aux alliés du Canada de l'OTAN financées en vertu des lois sur les crédits de défense; les approvisionnements de soutes et de navires vendus aux navires et aéronefs étrangers dans les ports canadiens; en général, toutes les exportations provisoires et les marchandises qui séjournent temporairement en transit, en territoire canadien.

4. Pays de destination: Les exportations sont créditées aux pays vers lesquels les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue.

5. Quantités: Les tableaux 4 et 6 donnent les quantités selon le système d'unités indiquées pour chaque catégorie dans la Classification des marchandises d'exportation, Vol. I (B.F.S. numéro de Catalogue 12-521). Quand aucune unité de quantité n'est mentionnée, les colonnes réservées aux quantités sont laissées en blanc. Le tableau 5 indique les quantités seulement là où toutes les catégories dans un groupe ou la majeure partie des catégories utilisent la même mesure de quantité.

Les unités de poids ou de volumes visent le poids ou le volume des marchandises et ne comprennent pas ceux des emballages nécessités par l'expédition. Les unités de nombre représentent le nombre d'articles complets (ou dans un état assez complet) exportés, en excluant les pièces (dans n'importe quelle catégorie de marchandises où la valeur enregistrée comprend les articles complets de même que les pièces de ces articles, il est impossible d'établir la valeur moyenne par unité complète). Toutes les unités de quantité employées dans ce rapport sont expliquées à la page 7.

6. Values: Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of exports in any commodity class (or group) to a particular country is less than \$500, no line for that country is printed in the report. Where the cumulative value is more than \$500 but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in the report.

7. Abbreviations: Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".

8. Revisions: All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each monthly report.

6. Valeurs: Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou à recevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.) Cette définition établirait donc la valeur des exportations f. à b. point de destination, mais on réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des exportations dans une catégorie (ou groupe) quelconque vers un pays en particulier n'atteint pas \$500, alors ce pays ne paraît pas dans le rapport. Lorsque la valeur cumulative est supérieure à \$500, et la valeur touchant le mois en cours est inférieure à \$500, le rapport n'indique aucune valeur dans la colonne du mois en cours; une valeur est indiquée, cependant, dans la colonne de la valeur cumulative. Dans ces cas-là, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas. Tous les totaux et les valeurs cumulatives sont calculés à partir de chiffres non arrondis qui sont ensuite arrondis indépendamment en milliers de dollars; ces valeurs ainsi obtenues peuvent souvent différer de la somme des valeurs arrondies figurant dans chaque rapport mensuel.

7. Abréviations: Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans la "Classification des marchandises d'exportation, Vol. I". Les lettres "n.d.a." signifient "non dénommé ailleurs".

8. Rectifications: Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de chaque rapport mensuel.

Value, Price and Volume Indexes of Domestic Exports

This report continues the publication, begun in January 1961, of the value, price and volume indexes of domestic exports arranged according to the sections of the Export Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in export value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948-based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

Indices de la valeur, des prix et du volume des exportations nationales

Ce rapport fait suite à la publication, commencée en janvier 1961, des indices de la valeur, des prix et du volume des exportations nationales, disposés d'après les sections de la Classification des marchandises d'exportation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'exportation, est complètement exclue des indices.

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification. L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.
